To whom it may concern,

Re: Bench Project with Tim Germain

In the late summer of 2021 the Munnings Art Museum was delighted to install a bench designed and hand crafted by Tim Germain.

The bench was placed in the peaceful gardens of Castle House, the museum, and has been extremely well received by staff, volunteers and members of the public alike. As hoped for, at the outset of the project, those using the bench in such tranquil surroundings find it to be a place to sit, take time out from busy lives and contemplate both nature and the art around them.

The craftsmanship of the bench is excellent. It is both beautiful and robust and clearly Tim is experienced in creating practical yet artistic furniture appropriate to the setting in which it is placed.

The design process was straightforward and Tim worked with members of the community to develop the design for the bench. As this was during the pandemic sessions were convened online and much ground was covered with discussion and explored ideas until the look of the final piece was decided upon.

Installation of the bench was simple and took only a couple of hours to complete.

We are happy to recommend working with Tim.

Yours sincerely,

Jenny Hand
Director
Munnings Art Museum
